Enrichment Clusters At Renzulli Academy Give Back

Each week, for one hour, the Renzulli Academy partakes in different enrichment clusters to further enhance their learning experience. Among the clusters offered this cycle are Kitchen Kapers, Healthy Habits, Visual arts, and more.

The Social Action cluster was formed to help kids band together to help a great cause. Now, it has not only helped one cause, but two. One half of the Social Action cluster has formed to help animals. They are taking donated tee-shirts, cutting them into strips, and braiding them together to make toys for puppies, kittens, cats, and dogs. They are also collecting food for these animals. They were donated to the Connecticut Humane Society in Newington on the same day the students from the cluster took an hour tour!

The other half of the Social Action cluster has formed a Benefit Concert that will raise money to donate to the Make-A-Wish Foundation and Autism Speaks. The cluster has come a long way since the beginning of this cluster cycle, but overall the effects of their efforts are extraordinary.
